- Access to and from the road via our own vehicle park
- Complete worldwide logistics service

Industrial warehousing for heavy and project goods where they are needed.

We operate three heavy goods warehouses with crane capacity up to 400 tonnes at the traffic hub of Rhein-Main/Neckar. We organise safe and secure traffic routes from industrial centres in Southern German to our warehousing and convenient handling places.

When requested by clients, we can operate temporary warehousing at any suitable location. For larger projects, we provide efficient solutions Europewide.
